True Potential Pictet Balanced

30 June 2026

Fund objective

The Fund seeks to deliver growth over a rolling 3 year period net of fees.

June Update

Global equities edged slightly lower in June amid concerns that US interest rates could remain elevated and weakness across major technology firms. Emerging Market (EM) equities posted declines and underperformed their developed market counterparts, dragged down by China. In developed markets, European shares outperformed, while US technology stocks proved a laggard. In fixed income, both UK Gilts and US Treasuries gained.

The True Potential Pictet Balanced Fund returned -0.35% (net of fees), with the Fund's sizeable exposure to equities weighing on returns in local-currency terms. The allocations to global thematic equity funds produced mixed returns, with the biotech theme significantly outpacing the broader market. Conversely, the robotics theme underperformed, posting negative returns over the month. The tilts towards the Pictet Quest AI-Driven Global Equities and Pictet Quest Global Sustainable Equities fared better yet also produced slight declines. Elsewhere within the segment, the Fund's modest exposure to the S&P Global Mining ETF was particularly weak, while the allocation to global EM and Latin American equities also detracted. In fixed income, the Fund's exposure to US inflation-linked Treasuries weighed on returns, as did the allocation to convertible bonds via the SPDR FTSE Global Convertible Bond ETF. The Fund's allocation to EM local-currency debt also produced negative returns. Conversely, the exposure to investment-grade and high-yield bonds was supportive. In alternatives, the allocation to commodities via the UBS Commodities ETF and Invesco Physical Gold Fund detracted.

Growth of £10,000 invested since launch

What is the benchmark for this fund?

The benchmark for this fund is Morningstar UK Moderate Target Allocation. The benchmark may be used as a guide to compare and assess the performance of the Fund. This benchmark tracks the performance of an index that represents assets or securities with a similar risk profile to the Fund. Our aim is to help you monitor how your investment is performing. This benchmark reflects the multi-asset nature and relative risk profile of the Fund. The Fund does not use the benchmark as a target, nor is the Fund constrained by it. The mix of assets in the Fund may vary from those of the benchmark (and its constituents). Accordingly, it should be used for reference purposes only.

Key fund information

Accumulation shares: this type of share reinvests the income generated by its underlying assets (such as dividends or interest) back into the fund, rather than paying it out to shareholders as income.

Income shares: this type of share pays out the income generated by the fund's underlying assets (such as dividends or interest) directly to investors, rather than reinvesting it back into the fund.

Fund details	Accumulation shares
ISIN	GB00BMF19606
12 month yield*	0.89%
Launch Date	24/02/2022
Ongoing Charges Figure (OCF)**	0.74%
Risk profile	Balanced
Investment Manager	True Potential Investments
Sub-Investment Manager	Pictet
Minimum Recommended holding period	5 years
Income payment frequency	Annual

* The 12 month yield reflects distributions declared over the past 12 months, as a percentage of the latest share/unit price. Investors may be subject to tax on their distributions. Yield as at 30 Jun 2026. Source: True Potential Administration LLP.

**OCF payable can fluctuate over time as the underlying investments are variable and can change. The OCF figure is sourced from the Key Investor Information Document (KIID) dated 16 Feb 2026 found at www.truepotential.co.uk/fund-documents.

Who is this fund suitable for?

This fund is suitable for all investors under the advice of a professional adivser, or investing through the True Potential Portfolios. The minimum recommended holding period is 5 years. Please be aware there is no guarantee that the fund will meet its investment objectives. The Fund is available to those that do not need a capital guarantee and are aware that their capital is at risk. Clients who are unable to bear loss of capital should not invest in this Fund.

What are the fees associated with investing in this fund?

The OCF of this fund is currently 0.74%. This means that if you invest £1000 in the fund, you can expect to pay £7.40 in fees over the course of a year. The fees you pay are pro-rata. If you hold the fund for less than a year you will only pay the proportional amount of fees applicable (based on the duration of your investment).

Risks

The following are some of the key risks associated with investing in this Fund. For a complete list of risks, please refer to the Fund's prospectus, available at www.truepotential.co.uk/fund-documents. **Please be aware that there is no guarantee that capital will be preserved.**

Risk type	Description
Investment Fund Risk	This Fund invests into other investment funds, they may invest in different assets, countries or economic sectors and therefore have different risk profiles not in line with those of this Fund.
Performance Risk	Investment objectives express an intended result but there is no guarantee that such a result will be achieved. Depending on market conditions and the macro-economic environment, certain investment types and styles may perform better than others and investment objectives may become more difficult to achieve.
Emerging Market Risk	Investments in emerging markets may involve greater risks due to political and economic instability, and underdeveloped markets and systems.
Counterparty Risk	There may be cases where the organisation from which we buy a derivative, or an asset, fails to meet its obligations. The Fund's cash deposits are also subject to counterparty risk.
Derivative Risk	The Fund is entitled to use derivatives. Derivatives may not achieve their intended purpose. Their prices may move up or down significantly over relatively short periods of time which may result in losses greater than the amount paid.
Operational Risk	The Fund faces non-market risk, relating to purchasing, holding and servicing the Fund's assets.
Credit Risk	Where the Fund invests in bonds, there is a risk the bond issuer may fail to meet its repayments. Changes in interest rates, inflation and the creditworthiness of the bond issuer may also affect the bond's market value. This risk is particularly relevant where the fund invests in bonds with a lower credit rating.
Exchange Rate Risk	The Fund may invest in securities not denominated in GBP. The value of your investments may be affected by changes in currency exchange rates.
Investment Trust Risk	Investment trusts and closed ended funds may borrow to purchase additional investments. This can increase returns when stock markets rise but will magnify losses when markets fall. The value of an investment trust or a closed-ended fund moves in line with stock market demand and its share price may be less than or more than the net value of the investments it holds.
Liquidity Risk	Certain market conditions could make sufficiently liquid assets difficult to sell quickly at a fair price. This could result in an unpredictable fall in the value, and overall liquidity of the Fund.
